Kostiantin Troianivski *Senior Full Stack Developer*

troyankostandd@proton.me +40 793 862 988 Str. Gheorghe Doja 174, Arad, Romania in/konstantin-troyanivski-b0603a3b0/
@troyankostandd

Seasoned Senior Full Stack Engineer with 8+ years designing and operating high-availability, cloud-native SaaS platforms across multiple domains. Proven expertise in Node.js and React, with deep experience building production-grade microservices, serverless APIs, and Kubernetes-based deployments on AWS, Azure, and GCP. Strong background in event-driven architecture, IaC (Terraform), CI/CD automation, and DDD, complemented by mentoring junior engineers and driving performance optimizations.

SKILLS

Node.js:
Node.js, JavaScript event loop, asynchronous programming, FastAPI (Python integration), NestJS, Express

React:
React, Next.js, Redux/RTK, Zustand, Material UI, Tailwind CSS, SSR

Microservices Architecture:
Microservices, Domain-Driven Design (DDD), Clean Architecture, Service decomposition

Serverless Computing:
AWS Lambda, Azure Functions, Google Cloud Functions, Serverless deployment, serverless event sourcing

Managed Kubernetes:
EKS, AKS, GKE, Docker, Helm, CRDs, Operators, auto-scaling

Infrastructure as Code:
Terraform, AWS CDK, Pulumi, CI/CD pipelines, AWS SAM, Azure Resource Manager

Event-Driven Systems:
RabbitMQ, Kafka, SQS, Azure Service Bus, event streaming, decoupled processing

CI/CD & Automation:
GitHub Actions, Jenkins, GitLab CI, CircleCI, Vercel, blue-green deployments, automated testing

Multi-Tenant SaaS Platforms:
Tenant isolation, SaaS scalability, security, observability, performance tuning

Observability & Monitoring:
Prometheus, Grafana, ELK, Datadog, logging, tracing, alerting

AWS:
AWS IAM, EC2, S3, RDS, Lambda, VPCs, managed services

Azure:
Azure App Service, AKS, Cosmos DB, Functions, networking fundamentals

GCP:
Google Cloud Run, GKE, Cloud Storage, BigQuery, managed databases

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer *Netguru*

11/2021 - 11/2025 | Warsaw, Poland (Remote)

- Designed and delivered production-grade SaaS platforms with React (Next.js) and Node.js, serving 18k+ monthly users; implemented SSR to improve SEO and reduce initial page load times.
- Built serverless REST and GraphQL APIs on AWS Lambda (NestJS) and Azure Functions, leveraging TypeScript, auto-scaling, and event sourcing.
- Engineered microservices architecture on managed Kubernetes (EKS/AKS) using RabbitMQ for asynchronous event processing, ensuring fault isolation and scalability.
- Implemented IaC (Terraform) to provision cloud resources across AWS, Azure, and GCP, including VPC, managed databases, S3 buckets, and Helm-deployed services.
- Created robust CI/CD pipelines with GitHub Actions and Jenkins, automating testing, deployment, and zero-downtime blue-green rollbacks, reducing rollback time to under 10 minutes.
- Optimized performance with Redis caching, PostgreSQL connection pooling, read replicas, and query tuning, lowering p95 latency under peak traffic.
- Refactored monoliths into microservices following DDD principles, improving maintainability and developer onboarding.
- Developed a nightly data synchronization service using FastAPI (Python) that writes results to PostgreSQL and Elasticsearch without impacting production traffic.
- Implemented observability stacks (Prometheus, Grafana, ELK) to monitor service health, latency, and error rates across multiple environments.
- Mentored junior engineers through code reviews, pair programming, and architecture guidance, driving overall code quality and delivery velocity.

Full Stack Developer *Dashbouquet Development*

10/2017 - 11/2021 | Warsaw, Poland (Remote)

- Created user-management dashboard with React and Next.js, applying SSR and CDN optimizations to achieve high SEO scores and low initial load times.
- Developed REST APIs with NestJS and Node.js, handling authentication, CRUD operations, and integrating payment gateways and shipping services using async patterns.
- Containerized services with Docker and orchestrated on managed Kubernetes clusters (EKS), enabling auto-scaling for variable traffic loads.
- Deployed serverless functions for data processing using AWS Lambda and Azure Functions to minimize operational overhead.
- Automated CI/CD workflows with GitHub Actions and GitLab CI, ensuring zero-downtime deployments and rapid rollbacks.
- Designed event-driven pipelines with RabbitMQ and Azure Service Bus to decouple front-end and back-end components.
- Used Terraform to manage cloud resources across AWS and Azure, covering VPC, security groups, and managed databases.
- Built observability pipelines with Datadog and Prometheus, monitoring request latency, error rates, and infrastructure metrics.
- Improved tenant isolation and security in multi-tenant SaaS architecture by leveraging API gateways and role-based access control.

Junior Developer *VOIS Romania*

07/2014 - 09/2017 | Bucharest, Romania (On-Site)

- Contributed to React features and UI components, applying knowledge of the JavaScript event loop to manage asynchronous data fetching.
- Implemented basic RESTful endpoints in Node.js/Express and Java/Spring Boot, adhering to clean coding standards and async programming patterns.
- Assisted in debugging and fixing production bugs, collaborating with QA to increase test coverage.
- Added unit tests and updated API documentation, supporting CI pipelines for consistent releases.
- Performed SQL query tuning and data validation tasks in PostgreSQL/MySQL under senior guidance, improving reporting accuracy.

Python:
Python 3.6+, FastAPI, data synchronization, scripting

TypeScript:
TypeScript, static typing, frontend and backend integration

Security & Compliance:
OWASP best practices, secure API design, authentication, encryption

RESTful & GraphQL APIs:
REST, GraphQL, API versioning, backward compatibility

Databases & Data:
PostgreSQL, MySQL, Redis, MongoDB, DynamoDB, connection pooling, read replicas, query tuning

Observability Fundamentals:
Linux administration, networking basics, low-level debugging

SEO Best Practices:
Server-side rendering, lazy loading, performance optimization

EDUCATION

Politehnica University of Bucharest
Bachelor's degree in Information Technology
10/2010 - 06/2014
Bucharest, Romania
