Kostiantin Troianivski *Senior Full Stack Developer*

troyankostandd@proton.me | +40 793 862 988 | Str. Gheorghe Doja 174, Arad, Romania | in/konstantin-troyanivski-b0603a3b0/
@troyankostandd

Senior Full Stack Developer with 8+ years of experience delivering scalable SaaS and enterprise solutions built with TypeScript, React, Next.js, and Node.js. Demonstrated expertise in designing modular architectures, optimizing performance on AWS using Docker, Kubernetes, Redis, and RabbitMQ, and establishing robust CI/CD pipelines with Jenkins, GitHub Actions, and automated testing frameworks. Mentors junior engineers, drives clean-code practices, and leads remote-first teams toward high-quality, production-ready releases.

SKILLS

Frameworks and Libraries:
React, Next.js, NestJS, Vue.js, Zustand, Redux/RTK, Tailwind CSS, Material UI, Node.js, Spring Boot, .Net

Programming Languages:
JavaScript, TypeScript, Node.js, Python, PHP, Java, C#

Cloud & DevOps:
AWS (IAM, EC2, S3, RDS, Lambda), GCP, Azure, Kubernetes, Docker, CI/CD Tools (Jenkins, GitHub Actions, GitLab CI, CircleCI), Terraform

Other Technologies:
RESTful APIs, GraphQL, WebSockets, Event-driven architecture, Microservices, Domain-Driven Design (DDD), Clean Architecture, Security best practices (OWASP), Testing frameworks (Jest, Playwright)

Databases & Data:
PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Kibana, DynamoDB, ORM/ODM (Prisma, TypeORM, Sequelize, Mongoose), RabbitMQ

EDUCATION

Politehnica University of Bucharest
Bachelor's degree in Information Technology
10/2010 - 06/2014
Bucharest, Romania

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer *Netguru*
11/2021 - 11/2025 | Warsaw, Poland (Remote)

- Built a customer-facing analytics SaaS serving ~18k monthly users, developing the frontend with TypeScript/React and Next.js and adding server-side rendering (SSR) to boost SEO and cut initial page load.
- Migrated a legacy PHP reporting backend to NestJS (TypeScript) on PostgreSQL, optimized queries, added indexes, and eliminated long-running requests during peak traffic.
- Created internal admin tools in Vue.js, enabling operations teams to manage data without manual spreadsheets.
- Designed and maintained both REST and GraphQL APIs for web and mobile clients, ensuring backward compatibility and staged rollouts.
- Improved system performance and reliability by introducing Redis caching and RabbitMQ background processing, reducing synchronous failures under traffic spikes.
- Deployed services on AWS EC2, RDS, S3, then containerized them with Docker and orchestrated with Kubernetes, fixing autoscaling and health-check issues in production.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions, lowering deployment errors and rollback time to under 10 minutes.
- Developed nightly data synchronization service with FastAPI (Python) that stores results in PostgreSQL and Elasticsearch, preserving production load.
- Tuned PostgreSQL and MySQL with connection pooling, read replicas, and query optimization, cutting p95 latency significantly.
- Applied Domain-Driven Design and Clean Architecture while decomposing a monolith into modular services, enhancing maintainability and onboarding.
- Mentored junior full-stack developers through code reviews, pair programming, and architecture guidance, raising code quality and delivery velocity.

Full Stack Developer *Dashbouquet Development*
10/2017 - 11/2021 | Warsaw, Poland (Remote)

- Developed and deployed a user-management dashboard with React and Next.js, adding SSR to improve SEO and speed.
- Built RESTful APIs with NestJS and Node.js for user authentication, profiles, and product CRUD within an e-commerce marketplace.
- Optimized PostgreSQL queries by adding targeted indexes and refactoring slow SQL, reducing response times.
- Integrated third-party payment and shipping APIs, resolving data-format mismatches and authentication failures.
- Configured CI/CD pipelines with GitHub Actions, automating testing and deployment.
- Collaborated with designers to implement responsive UIs using Tailwind CSS and Material UI.
- Implemented unit tests using Jest and Playwright, improving test coverage across frontend and backend.
- Migrated legacy services to Docker containers for consistent development environments.
- Worked with Kubernetes deployment manifests to enable scaling of backend services.

Junior Developer *VOIS Romania*
07/2014 - 09/2017 | Bucharest, Romania (On-Site)

- Built small web features using TypeScript/React, focusing on component reuse and state management.
- Implemented basic REST endpoints in Node.js/Express and Java/Spring Boot under senior guidance.
- Fixed bugs and delivered enhancements based on QA feedback, adhering to defined acceptance criteria.
- Added Jest and Playwright tests to existing modules, increasing automated test coverage.
- Wrote SQL queries for simple reporting, data validation, and data correction tasks.
